

Support Ticket SUP-001

HuggingFace Spaces - Docker Build Failure

Ticket Details

Ticket ID:	SUP-001
Vendor:	HuggingFace
Severity:	CRITICAL
Status:	Open
Date Opened:	2026-03-28
Opened By:	Skip Snow
Forum Post:	https://discuss.huggingface.co/t/critical-docker-space-stuck-in-building-state-stalls-minutes-and-not-resolving/174739
Forum Case #:	174739
Space:	SkipSnow/dev_ChatHealthyAIChatWindow
Impact:	Blocking v0.1.2 release prep with Tuesday 2026-03-31 deadline

Issue Description

Summary

Docker Space (SkipSnow/dev_ChatHealthyAIChatWindow) has been stuck in BUILDING stage for over 30 minutes following a successful git push. The Space is currently unresponsive.

Recurring Problem

This has been a recurring problem since we converted this Space to Docker SDK. Build times are unpredictable - sometimes 2 minutes, sometimes 30+ minutes with no progress.

Hardware Upgrade Attempt

We upgraded from cpu-basic to cpu-upgrade specifically to get better build times. That caused a different problem - a hardware mismatch where the Space requested cpu-upgrade but was allocated cpu-basic, leaving it stuck in BUILDING indefinitely. We had to factory-restart back to cpu-basic to recover from that incident.

Dockerfile

The Dockerfile is a minimal 7-line file based on the HuggingFace Docker template with no custom build logic:

```
FROM python:3.12-slim
WORKDIR /app
COPY requirements.txt .
RUN pip install --no-cache-dir -r requirements.txt
COPY . .
EXPOSE 7860
CMD ["python", "main.py"]
```

Technical Details

SDK:	docker
Hardware:	cpu-basic (current and requested both cpu-basic, no mismatch)
Repo SHA:	54e2aa5329f0 (latest push, verified via /tree/main API)
Runtime SHA:	f9335c700a9e (stale, from previous build)
Replicas:	current=0, requested=1

Remediation Attempted

- Factory restart (POST /restart?factory=true) - did not resolve
- Regular restart - did not resolve
- Build log API returns timeout (no log data streaming)
- Previous container was killed by factory restart so Space is now unresponsive
- Code confirmed in HF repo (url_guardian.py visible in file listing)

Notes

HuggingFace does not offer a support ticket system for free-tier users. The support page (huggingface.co/support) redirects to a sales contact form. This issue was posted to the HuggingFace community forum. The forum has unanswered posts dating back to August 2025.

This incident reinforces the architectural decision to build for host portability (ARCH-001 in backlog). The portability refactoring planned for Sprint 2 will enable moving to Azure App Service with a configuration change only.
